In Touch with Tomorrow
TOSHIBA

The Toshiba Pocket P

The company that pioneered portable computing creates a new breed of digital assistant—and a new way to stay productive anytime, anywhere.

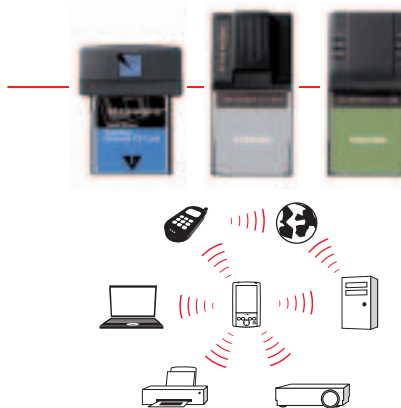

Unprecedented Expandability Inside the Toshiba Pocket PC e570, you'll find a host of advanced technologies that deliver phenomenal power, speed, and flexibility. It's the first PDA with two built-in expansion slots: one for Secure Digital™ (SD) cards and one for CompactFlash II (CFII) cards. That means additional storage, a choice of wireless and wired networking options, and many other capabilities are available on demand. Which means you can get more accomplished in more places than ever before, without expensive, clumsy add-ons.

Maximum Connectivity The Toshiba Pocket PC e570 lets you connect any way you want, wherever you happen to be. Just drop in an optional Bluetooth™ SD card to wirelessly connect with Bluetooth-enabled PCs, mobile phones, and other devices. Pop in a Wi-Fi CFII card to connect to a wireless LAN and the Internet, or use other cards for Ethernet and modem connections.¹

Total Mobility With this mobile business tool, workers can now have the latest information and email at their fingertips. Sales reps, for example, can easily track customer shipments from the field. Airline agents can issue boarding passes and provide flight information from anywhere in the airport. Grocery clerks, meanwhile, can update inventory data as they rove the aisles.

There are many other capabilities you can add; with two industry-standard expansion slots, the possibilities are practically endless. You can add more memory and use a communications card at the same time. You can attach an optional GPS receiver to help you find your way around town, while enjoying your favorite MP3 audio files in stereo sound. You can even watch movies and video clips, taking full advantage of the brilliant 3.5" color screen.

Contacts, schedules, tasks—the Pocket PC e570 makes it easy to manage all the data you'd expect to find in a PDA. The difference is it does a whole lot more.

Optional expansion cards support instant wireless connections with mobile phones, PCs, peripherals, or the Internet

Stereo headphone jack

Built-in microphone and digital memo recorder

Voice recorder button

Infrared port

Advanced lithium ion power pack

Custom color side panels

Cradle connection and recharging ports

USB cradle

Seeing is believing

You'll be amazed how brilliant images appear on the Pocket PC e570. Its 3.5" reflective TFT display offers 240x320 resolution and thousands of colors, with backlighting that keeps the image sharp in any conditions.

The job at hand

This mobile business tool comes with an unprecedented number of productivity-enhancing applications, including pocket versions of familiar applications like Microsoft Excel, Word, Outlook® and Internet Explorer.

Ready to go

You'll find everything you need to get started right in the box. The versatile hardware bundle includes a soft case, AC adapter, stylus, and USB desk cradle, perfect for quick recharges and synchronization with PCs and other devices.

Record your thoughts

An integrated microphone lets you record digital voice memos wherever you go. Play them back later on the built-in speaker—or plug in the optional remote control earphones for privacy.

Ce570: An incredibly powerful, easily expandable, wireless-capable PDA.

A Heavyweight in Disguise The Toshiba Pocket PC e570 puts astonishing performance right in your hand. Toshiba takes the PDA—and productivity—to new levels with this powerful business tool. The Pocket PC e570 combines our most innovative technologies with pocket versions of leading applications, allowing you to enjoy desktop productivity wherever you go.

This is one of the first PDAs to come with Microsoft® Windows® Powered Pocket PC 2002 Software preinstalled,

providing a range of applications ideal for the enterprise user. Virtual Private Network and Terminal Services Client features, for example, allow remote users to safely access sensitive data and email, as well as applications on corporate servers.

The Pocket PC e570 also comes equipped with the advanced Intel® StrongARM™ 206MHz processor, enabling it to handle the most demanding applications in record time.

Internal Secure Digital and CompactFlash II card slots support a wide range of storage, communication, and other expansion options

High-contrast 3.5" TFT color touch-screen offers spectacular brightness and 240x320 resolution for easy viewing

QUICK ACCESS BUTTONS:
Calendar
Date/day/month/year at the touch of a button

Tasks
Check tasks and schedules at a glance

Menu
Instant access to a wealth of applications
